CAREER OBJECTIVE

Seeking a challenging internship opportunity in Full Stack Development, Data Science, or related technology domains where I can leverage my skills in Java, Python, and web technologies to build innovative solutions, gain practical industry experience, and contribute to impactful real-world projects.

SKILLS

Programming : Java, Python, C
Web Technologies: HTML, CSS, React.js
Database : MySQL, DBMS, NoSQL
Data Science : Data Analysis, Data Visualization, Pandas, NumPy, Machine Learning
Concepts : Data Structures, Algorithms, OOP, AI
Tools : Git, GitHub, VS Code, Jupyter Notebook, Power BI

EDUCATION

SRKR Engineering College(A) 2024 – 2028
B.Tech in Artificial Intelligence and Data Science Bhimavaram, India
CGPA: 9.2/10

PROJECTS

Loan Default Risk Prediction System | *Python, XGBoost, FastAPI* 2026

- Built an ML model to predict loan default risk with 87% accuracy.
- Developed REST APIs using FastAPI for real-time predictions.
- Created a user-friendly interface for risk analysis.

Sales & Revenue Analysis Dashboard | *Power BI, Excel* 2025

- Developed an interactive dashboard to analyze sales and revenue trends.
- Created KPI reports for sales performance and top products.
- Used filters and slicers for dynamic business insights.

AI-Powered Career & Resume Assistant | *Python, Flask, Firebase, NLP* 2025

- Developed an AI-based platform for resume analysis and career guidance.
- Implemented NLP for skill extraction and profile assessment.
- Integrated Firebase for authentication and data management.

INTERNSHIPS

Generative AI Virtual Internship — EduSkills Apr 2026 – Jun 2026

- Worked on Generative AI concepts including Prompt Design, Vector Search, and Responsible AI using Vertex AI.
- Explored AI application development and modern GenAI technologies.

Data Analyst Virtual Internship — Thiranex May 2026

- Developed dashboards and performed sales analysis using data visualization techniques.
- Worked on customer segmentation, predictive analytics, and data reporting automation.
